

2nd Global Conference on Decarbonizing India (GCDI '25)

Towards Achieving Net Zero

March 6 - 8, 2025

National Institute of Technology Calicut, Kerala, India

CONCLAVE & EcoVision AN INDUSTRY-NITC EXHIBITION

About GCDI

India emits 2.9 Gt of CO₂ annually, accounting for 4.9% of global emissions, making it the third-largest emitter. As India's economy continues to grow, careful planning and execution are essential to balance economic development with achieving the net-zero goal by 2070. Coordinated efforts involving industry, academia, government and research organizations are vital to striking the right balance between economic growth and decarbonization measures. The Global Conference on Decarbonizing India (GCDI '25) at NIT Calicut provides a platform for diverse stakeholders to address the challenges and explore technological solutions for decarbonization. GCDI'25 will feature sessions by more than 30 experts from leading universities and industries across the world. The international speakers from the USA includes experts from Boeing Research and Technology, GTI Energy, University of Central Florida, Stanford University and GE Aerospace. Experts from University of Amsterdam and University of Groningen, Netherlands also delivers their technical talks. The speakers from Indian institutes include experts from IIT Delhi, IIT Bombay, IIT Madras, IIT Kharagpur, IIT Tirupati, IIT Kanpur and IIT Kharagpur and technocrats from the government sectors including, LPSC, ISRO, Energy Management Centre, Kerala. An important highlight of GCDI '25 will be an exhibition by both industries and various departments and centres in NITC, titled CONCLAVE and EcoVision 2025, respectively, on the first day of GCDI '25.

CONCLAVE

Conclave aims to bring together experts from the industry and R&D organizations to address challenges concerning industry and academia, featuring:

- Exhibition of leading industries showcasing the advancements made in their field toward decarbonization
- Technical sessions, panel discussions and networking sessions on low-carbon energy solutions, strengthening fiscal policy and frameworks to drive clean energy investment, digital technologies and innovations
- **Chief guest:** Dr. Michael Georgiopoulos, Professor and Dean, University of Central Florida, US
Guests of honour: Dr. Navin Manjooran - Chairman, Solve, US & Mr. Prakash Shetty - MD, Gasotech Consultancy & Marketing Services & Director RS Group, Gurgaon, IN

EcoVision 2025

EcoVision 2025, is an exhibition dedicated to showcasing ground-breaking innovations and research from over 15 academic departments and interdisciplinary centres from NIT Calicut. This exhibition will serve as a platform for departments and centres to highlight their research excellence and achievements, underscoring NITC's pivotal role as a leader in academic research and technological innovation.
